This motor is certified for hobby rocketry use in the configuration it was tested for the members of the Tripoli Rocketry Association and all approving organizations with reciprocal agreements.

Motor Manufacturer: RCS Rocket Motor Components, Inc.
Manufacturer's Designation: F115SN-14A
Propellant: Slo Nine™
TMT Nomenclature: F114 (79.15 N-Sec)

Diameter: 29mm (1.14")
Overall Length: 123mm (4.84")
Motor Hardware: DMS™

Loaded Mass: Loaded Weight: 92.5g (0.20 lbs.)
Propellant Mass: 38.5g (0.08 lbs.)
Burnout Mass: 54g (0.12 lbs.)

Burn Time: .69 Seconds
Total Impulse: 79.15 N-sec (17.79 lb.)
Max Impulse: 146.7 N-Sec (32.97 lb.)
Average Impulse: 114.16 N-sec (25.66 lb-sec.)

Delay Time Data: 12, 10, 6 Seconds Adjustable using Universal Delay Drilling Tool™ (UDDT)

Case Temp: <77°C/171°F (NFPA 1125 7.4.1 200°C/392°F)

Number of Motors Tested: 9

Sincerely,

Art Hoag
